# Preparing for COVID-19 vaccination

## Make sure your details are correct

While you wait for your appointment, there are some things you can do now to get ready.

Make sure your details are [up to date with Medicare](#). You can do this using either your:

- [Medicare online account](#) through [myGov](#)
- the [Express Plus Medicare app](#).
- calling the [Medicare program](#).

If you don't have your account set up, you can:

- [Enrol in Medicare](#), if you're not already enrolled.
- [Set up](#) your Medicare online account, if you're enrolled in Medicare, but don't have Medicare linked to myGov.
- [Get an Individual Health Identifier \(IHI\)](#), if you're not eligible for Medicare.

Once you've had your vaccine, you'll be able to get an immunisation history statement to prove your vaccination status. You can find out [how to get your immunisation history statement](#) on the Services Australia website.

## Getting ready for your appointment

There is a limited supply of COVID-19 vaccines in Australia and globally. This means, people who have the highest risk of severe COVID-19 and/or exposure to the virus will receive the vaccine first. Other people will receive vaccine over time. Find out who will be prioritised for vaccination by visiting [www.health.gov.au/covid19-vaccines](http://www.health.gov.au/covid19-vaccines).

You should **not** attend a COVID-19 vaccination appointment if you:

- Are unwell with fever, cough, runny nose or other symptoms that could be from COVID-19.
- Are awaiting COVID-19 test results.
- Have tested positive with COVID-19 and you are in isolation.
- Are in quarantine.
- Are a close contact of someone with COVID-19.

If you fall into any of the above categories, check with your immunisation provider. You may need to reschedule your appointment for vaccination. COVID-19 vaccines are not effective at treating COVID-19.

If you have had another vaccine in the 14 days before your COVID-19 vaccine appointment, tell your immunisation provider. Your immunisation provider may ask you to reschedule your appointment.

You are not required to test for COVID-19 before vaccination if you do not have a fever or any respiratory symptoms.

### **Plan ahead for two doses**

It is important that you receive two doses of your COVID-19 vaccine at least three weeks apart. Full protection against COVID-19 will not occur until about a week after your second dose.

### **What to expect at your vaccination appointment**

You should bring the following to your COVID-19 vaccination appointment:

- Photo ID, if you have one.
- Medicare card, if you have one.
- Employee ID, if you are getting a COVID-19 vaccine because of your occupation.
- Information about any of your medical conditions, allergies, bleeding disorders or immunocompromise (i.e. weakened immune system).
- Information about any medications you are taking.
- Information about any previous COVID-19 vaccine received (vaccine brand and date of vaccination).
- Information about any reactions you have had to any vaccine in the past.
- Name of your current GP/s and any specialist doctors you see.
- A face mask (if required by your state/territory).

At your appointment, you will be able to discuss any questions you have about COVID-19 vaccination with your immunisation provider.

Tell your immunisation provider if you have any medical conditions or if you are taking any medications. Especially make sure to tell them if you:

- Have had anaphylaxis (a type of severe allergic reaction) to any substance, or if you have an adrenaline autoinjector (e.g. EpiPen).
- Have had a reaction to any vaccine in the past.
- Have a bleeding disorder or are receiving anticoagulant therapy (a blood thinner).
- Are pregnant, breastfeeding or planning pregnancy.
- Are immunocompromised (i.e. have a weakened immune system or take immune suppressing medication).
- Have received another COVID-19 vaccine (and which brand).
- Have received any vaccine in the last 14 days.

In some circumstances, it may be better to have a discussion with your healthcare provider about vaccination before making an appointment for vaccination. You can also read the *Information on COVID-19 Pfizer (Comirnaty) vaccine*.

## **How you will receive the vaccine**

You will receive the vaccine as an injection, most commonly into your upper arm muscle. You must remain in the vaccination clinic for observation for at least 15 minutes after vaccination. Depending on your medical history, you may be asked to wait in the clinic for 30 minutes.

## **How is the information you provide at your appointment used**

For information on how your personal details are collected, stored and used visit <https://www.health.gov.au/covid19-vaccines>

# COVID-19 Consent Form (Pfizer)

Please print and hand this form to Reception Staff upon arrival

### Patient Information

Name:

Medicare Number:

Date of Birth:

Sex

Address:

Contact Telephone Number:

E-mail

Are you Aboriginal and/or

Yes

Torres Strait Islander?

No

Prefer not to answer

### Next of Kin (in case of Emergency)

Name:

	Yes	No
Have you had an allergic reaction to a previous dose of COVID-19 vaccine?		
Have you had anaphylaxis to another vaccine or medication?		
Have you had a serious adverse event, that following expert review was attributed to a previous dose of a COVID-19 vaccine?		
Have you ever had mastocytosis which has caused recurrent anaphylaxis?		
Have you had COVID-19 infection before?		
Do you have a bleeding disorder?		
Do you take medication to thin your blood (an anticoagulant therapy)?		
Do you have a weakened immune system (immunocompromised)?		
Are you pregnant or think you may be pregnant?		
Have you been sick with a cough, sore throat, fever, or feeling sick in another way?		
Have you had a COVID-19 vaccination before?		
Have you had another vaccine in the last 7 days?		
Have you ever had myocarditis or pericarditis?		
Do you currently have, or have you recently had acute rheumatic fever or endocarditis?		
Do you have congenital heart disease?		
For people under 30 years of age: do you have dilated cardiomyopathy?		
Do you have severe heart failure?		
Are you a recipient of a heart transplant?		
Are you over 60 years of age?		

**If you answer “Yes” to any of the questions above, please make an appointment with one of our GP’s to discuss whether the vaccination is suitable for you. If appropriate, you will be able to book for your vaccination after this appointment.**
